## BASIC PRACTICAL SKILLS EXAMINATION REPORT

Skill sheet #

**FF1-25**

Certification title

**Firefighter 1**

## Hoisting a Charged Hose Line

### Applicant Information

Candidate name

DFS ID #

Course #

### Evaluation

**Standard:**  
NFPA 1001, 2019 Edition  
**Skill Drill 9-19**  
Fire Fighter I, 4.1.2,  
4.3.20

#### Task

Properly hoist the charged hose line

#### Conditions and Outcome

The candidate shall be provided with a section of rope and a charged hose line. The candidate shall be able to properly hoist a charged hose line while wearing appropriate PPE.

Number	Task Steps	First Test		Retest #1		Retest #2	
		Pass	Fail	Pass	Fail	Pass	Fail
<b>1</b>	Make sure that the nozzle is completely closed and secure. An unsecured handle (known as the bail) could get caught on something as the hose is being hoisted, and the nozzle could open suddenly. Use a clove hitch, 1 to 2 ft (0.3 to 0.6 m) behind the nozzle, to tie the end of the hoisting rope around a charged hose line. Use a safety knot to secure the loose end of the rope below the clove hitch.						
<b>2</b>	Make a bight in the rope even with the nozzle shut-off handle, which must be in the forward (completely off) position. Insert the bight through the handle opening and slip it over the end of the nozzle. When the bight is pulled tight, it will create a half hitch and secure the handle in the off position while the charged hose line is hoisted. Communicate with the fire fighter above that the hose line is ready to hoist.						
<b>Final Test Result for Entire Task</b>
