		Pass	Fail	Pass	Fail	Pass	Fail
1	Select the appropriate length of pike pole based on the height of the ceiling. Determine which area of the ceiling will be opened. Position yourself to begin work with your back toward a door so the debris you pull down will not block your access to the exit.						
2	Using a strong, upward-thrusting motion, penetrate the ceiling with the tip of the pike pole. Face the hook side of the tip away from you.						
3	Pull down and away from your body, so the ceiling material falls away from you.						
4	Continue pulling down sections of the ceiling until the desired area is opened. Pull down any insulation, such as rolled fiberglass, found in the ceiling.
