BASIC PRACTICAL SKILLS EXAMINATION REPORT

Skill sheet #

FF1-29

Certification title

Firefighter 1
FIRE GROUND OPERATIONS
ATTACK AN INTERIOR STRUCTURE FIRE
ABOVE GROUND LEVEL

Applicant Information

Candidate name

DFS ID #

Course #

Evaluation

Standard:
NFPA 1001, 2013 Edition
5-3.10

Task

Attack an interior above ground level structure fire operating as a member of a team.

Conditions and Outcome

Given a scenario for a simulated above-ground level interior structure fire, a minimum of 1.5" attack line, hand tools, a team, and in full protective equipment, the candidate, while operating as a member of a team at an above-ground interior structure fire involving Class A materials, shall properly attack and extinguish the fire. **The candidate will complete this task with a minimum of 16 items answered correctly.**

Number	Task Steps	First Test		Retest #1		Retest #2	
		Pass	Fail	Pass	Fail	Pass	Fail
1	Properly wear full protective clothing and SCBA on air						
2	Place ladder or ensure ladder placed to fire floor, if reachable, for access, secondary egress or fire attack (based on scenario given)						
3	Check door before entering first floor						
	STANDPIPE PRESENT						
4	Obtain hose bundle, nozzle, gated wye, and spanner wrench and proceed with team member to floor below fire floor						
5	Direct team member to connect gated wye to standpipe and connect attack line to wye outlet						
6	Advance hose to fire floor so that nozzle is positioned at the fire floor with remaining dry line flaked up stairwell						
7	Direct team member to charge attack line and ensure kinks are removed						
8	Bleed attack line and adjust nozzle pattern if applicable (select highest flow if adjustable gallonage nozzle) while preventing water hammer						
9	Describe hose line replacement method should hose line burst prior to entry						
10	Cover door (protects team member) while team member checks door, sound floor for stability						
11	Stay low on entering and approaching fire						
12	Extinguish the fire using the attack pattern as directed by evaluator Circle one: DIRECT INDIRECT COMBINATION						
13	Simulate locating and suppressing interior wall, ceiling and subfloor fires
