<b>1</b>	Two fire fighters lift the portable tank off the apparatus. This tank may be mounted on a side rack or on a hydraulic rack that lowers it to the ground. Place the portable tank on as level ground as possible beside the engine. The driver/operator will indicate the best location.						
<b>2</b>	Expand the tank (metal-frame type) or lay it flat (self-expanding type).						
<b>3</b>	One fire fighter helps the driver/operator place the strainer on the end of the suction hose, put the suction hose into the tank, and connect it to the engine.						
<b>4</b>	The second fire fighter helps the tanker driver discharge water into the portable tank. If the tank is self-expanding, the fire fighters may need to hold the collar until the water level is high enough for the tank to support itself.
