1	Size up the door, looking for any safety hazards. Determine the number and location of locks and the locking mechanism. Place the adze end of the Halligan tool in the space between the door and the door jamb. Gap the door by rocking the tool up and down to spread the door from the door jamb.						
2	Set the tool and pry the door out by pulling on the Halligan tool so the adze can be driven in past the door jamb. Be careful not to bury the tool in the door jamb. Strike the Halligan tool to drive the adze end of the tool past the door jamb.						
3	Force the door by pulling the Halligan tool away from the door. Control the door to limit ventilation of the fire and to prevent it from closing behind you.
