Task

Verify fire flows for a site, given fire flow test results and water supply data, so that required fire flows are in accordance with applicable codes and standards and deficiencies are identified, documented, and reported in accordance with the applicable codes and standards and the policies of the jurisdiction

Conditions and Outcome

Given flow test equipment, an installed water distribution system or a scenario and a Universal Water Flow Test Summary Sheet (Page 491 IFSTA Inspector, 8th ed.) the candidate shall verify fire flows for a site so that the results are documented accordingly and the fire flow is confirmed as being in accordance with applicable codes and standards. Identify, document and report any deficiencies in accordance with the applicable policies.
The candidate will complete this task with a minimum of 7 items answered correctly

Number	Task Steps	First Test		Retest #1		Retest #2	
		Pass	Fail	Pass	Fail	Pass	Fail
1	Perform test or use scenario data provided						
2	Personnel at test hydrant and all flow hydrants as necessary						
3	Remove cap from test hydrant and attach pressure gauge, assure all remaining caps are snug						
4	Open hydrant, bleed air from pressure gauge using petcock						
5	Record static pressure on test hydrant pressure gauge						
7	Open flow hydrant, record velocity pressure using pitot gauge, record residual pressure on test hydrant						
8	Close hydrants, return to service						
9	Record all results; compute flow thru graphical analysis
