1	Place the fan in front of the opening of a smoke-filled structure. The exact position depends on the size of the opening, the size of the fan, and the direction of the wind.						
2	Provide an exhaust opening from the structure. This opening can be made either before the fan is started or when the fan is started.						
3	Start the fan according to manufacturer's procedures.						
4	Check that the cone of air produced is completely covering the opening. Monitor the exhaust opening to ensure there is a unidirectional flow. Allow the smoke to clear.
